- Assessed performance of students in school by reviewing their past test scores and endeavored to keep them on track to exceed previous marks.
- Propelled academic success of dozens of students boosting GPA's and test scores to new bests.

Projects & Competitions

Sheridan College Game Maker Competition - *4th place*
- Developed "Pumpkin Head Invasion" a 3D first-person open world game utilizing gamemaker 8.0

UOIT Engineering Robotics Competition - *Semi-Finalist*
- Built & developed an autonomous robot that faced off with other robots from across the GTA in a SumoBot octagon

The Operations Research Challenge (TORCH)
- Solved complex decision-making problems in a variety of settings, including manufacturing, service industries, logistics, healthcare, energy, and finance.

Concours d'art Oratoire - *2nd place*
- Dufferin Peel French public speaking competition performed a speech on the effects of taking too many vitamins.

Peel regional science fair - *Bronze medalist*
- Developed and built a smart mining helmet for coal miners that measured the temperature, toxic gases and light intensity.
- Programmed to send messages to users' phone if any toxic gases are detected and data can be accessed online and can be seen in graph form.

Google Science Fair - *Still Judging*
- Built & developed Guard-R a wearable device that will measure air pollution, sound intensity, if the worker fell or not and integrated with Google Maps (GPS location of the worker).
- This is all updated real-time through a web-server so that supervisors can check on the health and safety of their workers.

Weston Youth Innovation Award - *Still Judging*
- Built and developed Back-X a wearable device that will measure the angle of curvature of an individual's back utilizing an accelerometer that warns users with haptic feedback.
- Additionally, by utilizing a force sensitive resistor Back-X will alert users through haptic feedback if the weight carried on their shoulders (backpack) is too heavy.
- Consists of an Android Application built with Java and the hardware side built with Arduino.
